

De Escalation of the suicidal patient in the ED

By Dr Shanthi Saha

BPD SEMINAR

This seminar is aimed at developing psychotherapeutic intervention to de-escalate suicidal behaviors and crisis presentation of borderline patients. This intervention is based on a psychodynamic formulation of the presentation. These clinical discussions require participants to bring one verbatim session of an interview with a borderline patient. This seminar would particularly suit psychiatry registrars, psychiatrists and senior clinicians working in the emergency department or dealing with such patients in crisis.
